## NAB 2011 ROUND-UP

### Final Cut Pro X Unveiled at Apple SuperMeet Brief

#### Summary of Highlights

The highlight of NAB was Tuesday evening's Final Cut Pro User Group SuperMeet which saw the announcement of Final Cut Pro 10 (FCP X) - which truly is a revolutionary re-imagining of non-linear editing by Apple.

Featuring a ground-up rewrite, true resolution independence up to 4K, 64 bit processing to support unlimited RAM, fully optimised background rendering on all processors/cores and graphics cards, brand new media management and automation, vastly improved colour correction and audio sweetening tools and impressive new timeline based editorial workflows.

### IRIDAS Unveils Lumetri at NAB 2011

#### New Product Announcement

For two years, IRIDAS has worked on a number of technologies for a new finishing product called Lumetri.

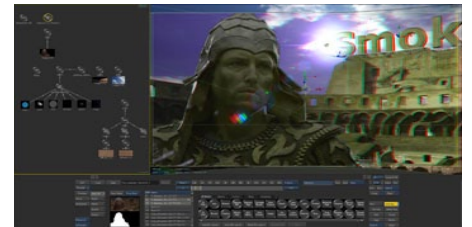

NAB 2011 marks the first time Lumetri is shown to the public. Lumetri is a fresh take on movie finishing with a specific focus on HDR and Stereo 3D but also introducing new effective tools for traditional colour grading tasks.

Lumetri will enter limited beta testing in May and will be available in the Autumn.
